

TEST REPORT IEC 62368-1

Audio/video, information and communication technology equipment Part 1: Safety requirements

Report Number.....: CTB240603005SX

Date of issue.....: Jun. 24, 2024

Total number of pages.....: 72

Testing laboratory

Name...... Shenzhen CTB Testing Technology Co., Ltd.

Bao'an District, Shenzhen, Guangdong, China

Applicant's name...... HangZhou NaKu Technology Co., Ltd

Address......: Binjiang District Xincheng Road NO.99 KaiHe Mansion, 215

Room, Hangzhou, Zhejiang, China

Test specification:

Standard.....: EN IEC 62368-1:2020+A11:2020

Test procedure.....: Safety report

Non-standard test method.....: N/A

TRF template used.....: IECEE OD-2020-F1:2021, Ed.1.4

Test Report Form No.....: IEC62368_1E

Test Report Form(s) Originator....: UL(US)

Master TRF.....: Dated 2022-04-14

Note

If there is any objection to the inspection results in this report, please submit a written report to the company within 15 days from the date of receiving the report. The test report is effective only with both signature and specialized stamp. This result(s) shown in this report refer only to the sample(s) tested. Without written approval of Shenzhen CTB Testing Technology Co., Ltd. this report can't be reproduced except in full. The tested sample(s) and the sample information are provided by the client. "*" indicates the testing items were fulfilled by subcontracted lab. "*" indicates the items are not in CNAS accreditation scope.

Test item description:	Laser Module
Trademark(s):	CivilLaser
Manufacturer:	HangZhou NaKu Technology Co., Ltd
Address::	Binjiang District Xincheng Road NO.99 KaiHe Mansion, 215 Room, Hangzhou, Zhejiang, China
Model/Type reference:	IRLaserModule
Ratings:	Input: 12V===1A

Responsible Testing Laboratory (as applicable), testing procedure and testing location(s):

	Testing Laboratory:	Shenzhen CTB Testing Technology Co., Ltd.		
Testing location/ address:		1&2/F., Building A, No.26, Xinhe Road, Xinqiao, Xinqiao Street, Bao'an District, Shenzhen, Guangdong, China		
Tested by (name, function, signature):		Jerry Qin (Test Engineer)	Jerry On	
Che	eck by (name, function, signature):	Finerb Bai (Supervisor)	Timela RESTECTION	
App	proved by (name, function, signature):	Kubo Lee (Chief Engineer)	M. E CETP &	

List of Attachments (including a total number of pages in each attachment):

ATTACHMENT 1: EN IEC 62368-1:2020+A11:2020 (NATIONAL DEVIATION). (21 pages) ATTACHMENT 2: PHOTO DOCUMENTATION(4 pages).

Summary of testing:

Tests performed (name of test, test clause
and date test performed):

The submitted samples were found to comply with the requirements of: EN IEC 62368-1:2020+A11:2020

Testing location:

Shenzhen CTB Testing Technology Co., Ltd. 1&2/F., Building A, No.26, Xinhe Road, Xinqiao, Xinqiao Street, Bao'an District, Shenzhen, Guangdong, China

Summary of compliance with National Differences (List of countries addressed):

EU group differences, the United Kingdom.

CENELEC member countries (EU group differences): Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland.

☐ The product fulfils the requirements of EN IEC 62368-1:2020+A11:2020.

Copy of marking plate:

The artwork below may be only a draft. The use of certification marks on a product must be authorized.

> Laser Module CivilLaser Model: IRLaserModule Input: 12V===1A CEA HangZhou NaKu Technology Co., Ltd Made in China

Remark for above marking:

- 1. The height of graphical symbols shall not be less than 5 mm;
- 2. The height of letters and numerals shall not be less than 2 mm;
- 3. The height dimension of CE mark should not less than 5mm, the height dimension of WEEE symbol should not less than 7mm;
- 4. The main rating label was attached in enclosure.

Page 4 of 72 Report No.: CTB240603005SX

Possible test case verdicts:	44
- test case does not apply to the test object: N/A	
- test object does meet the requirement P (Pass)	
- test object does not meet the requirement F (Fail)	
Testing:	64 65
Date of receipt of test item: Jun. 05, 2024	
Date (s) of performance of tests: Jun. 05, 2024 to Jun. 17, 2024	C C
General remarks:	5 S
"(See Enclosure #)" refers to additional information appended to the report. "(See appended table)" refers to a table appended to the report.	The st
Throughout this report a \square comma $I \boxtimes$ point is used as the decimal separator.	

General product information and other remarks:

- This equipment is a Laser Module for indoor use only.
- The product was submitted and evaluated for use at the maximum ambient temperature (Tma) permitted by the manufacturer's specification of: 35°C.
- Instructions and equipment marking related to safety is applied in the language that is acceptable in the country in which the equipment is to be sold.

IEC 62368-1_ATTACHMENT 1: NATIONAL DEVIATION						
Clause	Requirement - Test	Result - Remark	Verdict			

0	The relevant requirements are given in EN 71-1:2011, 4.20 and the related tests methods	0,0,0
	and measurement distances apply.	La Va
0.6.1.2	Non-ionizing radiation from radio frequencies in the range 0 to 300 GHz	N/A
	The amount of non-ionizing radiation is regulated by European Council Recommendation 1999/519/EC of 12 July 1999 on the limitation of	
	exposure of the general public to electromagnetic fields (0 Hz to 300 GHz). For intentional radiators, ICNIRP guidelines should be taken into account for Limiting Exposure to Time-Varying Electric, Magnetic, and	
C. T.	Electromagnetic Fields (up to 300 GHz). For handheld and body mounted devices, attention is drawn to EN 50360 and EN 50566.	CTY CTY C
0.6.2	Classification of devices without the capacity to estimate sound dos	se N/A
0.6.2.1	General	N/A
		C' C' C
	This standard is transitioning from short-term based (30 s) requirements to long-term based (40 hour) requirements. These clauses remain in effect only	CEB CEB C
	for devices that do not comply with sound dose estimation as stipulated in EN 50332-3.	CRB CRB C
	For classifying the acoustic output L_{Aeq} , τ , measurements are based on the A-weighted equivalent sound pressure level over a 30 s period.	CTP CTP C
	For music where the average sound pressure (long term L Aeq, τ) measured over the duration of the	Cra Cra
	song is lower than the average produced by the programme simulation noise, measurements may be done over the duration of the complete song. In	Cro Cro
	this case, <i>T</i> becomes the duration of the song.	CA CA
	NOTE Classical music, acoustic music and broadcast typically has an average sound pressure (long term $L_{Aeq,7}$) which is much lower than the average programme simulation noise. Therefore, if the player is capable to analyse the content and compare it	C C C
	with the programme simulation noise, the warning does not need to be given as long as the average sound pressure of the song does not exceed the required limit.	5000
	For example, if the player is set with the programme simulation noise to 85 dB, but the average music level of the song is only 65 dB, there is no need to give a warning or ask an acknowledgement as long as the average sound level of the song is not above the basic limit of 85 dB.	
0.6.2.2	RS1 limits (to be superseded, see 10.6.3.2)	N/A
	RS1 is a class 1 acoustic energy source that does not exceed the following:	0 0 0
	 for equipment provided as a package (player with its listening device), and with a proprietary 	C C C

8	Modification to 10.5.1			_
10.5.1	Add the following after the first paragraph:	5 5 5 S	A 4.0	N/A
	For RS 1 compliance is checked by measurement under the following conditions:			
	In addition to the normal operating conditions, all controls adjustable from the outside by hand, by any object such as a tool or a coin, and those			
	internal adjustments or pre-sets which are not locked in a reliable manner, are adjusted so as to give maximum radiation whilst maintaining an intelligible picture for 1 h, at the end of which the measurement is made.			ci ^{sto} ci
	NOTE Z1 Soldered joints and paint lockings are examples of adequate locking.			
	The dose-rate is determined by means of a radiation monitor with an effective area of 10 cm ² , at any point 10 cm from the outer surface of the apparatus.			
	Moreover, the measurement shall be made under fault conditions causing an increase of the high voltage, provided an intelligible picture is maintained for 1 h, at the end of which the measurement is made.			
	For RS1, the dose-rate shall not exceed 1 µSv/h taking account of the background level.			c C
C	NOTE Z2 These values appear in Directive 96/29/Euratom of 13 May 1996.	2 62 63	CA	c' c
9	Modification to G.7.1			
G.7.1	Add the following note: NOTE Z1 The harmonized code designations corresponding to the IFC cord types are given in Annex ZD.	CO C	D GD	Р
